SELECTED EXPERIENCES:

Power Platform Experience

Data-Driven Change Management (M365 Migration) Consultant – NHS, UK

- Led initiatives focused on data-driven change management during the NHS-wide **M365 migration**.
- Consolidated data from multiple sources, including ServiceNow and Viva Suite, to build **Power Apps** and **Power BI** solutions for reporting and visualization.

- Conducted **analytical walkthroughs** with clients, presenting insights on low-engagement organizations and delivering tailored **Power BI dashboards**.
- Designed and executed **A/B testing** to evaluate email communication effectiveness and derived insights to optimize communication strategies.
- Designed and implemented an **RPA** workflow in **UiPath** to automate the extraction of data from the NHS portal, integrated it into **Power BI** dashboards

Data Visualization Specialist - Public Investment Fund (PIF), KSA

- Conducted **requirement gathering sessions** and designed mock-ups basis client inputs
- Used **SQL** to analyse the data received from multiple sources for identifying the required data fields for visualization
- Developed Several comprehensive analytical **Power BI** Dashboards with large amounts of quantitative and qualitative data

Data Consultant for the leading NGO in wildlife conservation

- Designed and implemented a **VBA-based** financial model and a **Power App** for streamlined data capture on project funding and activities.
- Created an executive-level **Power BI** dashboard tracking key financial metrics to support strategic planning.
- Conducted user interviews to ensure solutions were aligned with stakeholder needs and organizational goals.

Power Platform Developer – Project Management Tool

- Developed a custom Power App for tracking project milestones, statuses, and financials.
- Built Power BI dashboards to provide real-time insights to leadership.
- Automated key processes using Power Automate, including:
 - Custom emails (with/without attachments) on project updates.
 - Teams alerts for deadlines and budget issues.

Generative AI POC Development Experience

- Developed **three PoCs: a Bid Generation Bot, a Bid Query Bot, and a Bid Evaluation AI**. Fine-tuned **open-source LLM models** (Llama, Mistral) & open-source libraries (Langchain), hosted on the open-source platforms Streamlit and Chainlit.
